

Efficacy

International reach through local focus

Field trial management and Biological Assessment Dossiers

Experience ♦ Unparalleled EU capabilities ♦ Local knowledge ♦ Out-of-season testing

The APC team has individuals with extensive **experience** and expertise, including many having spent over 20 years working with field trials and in related development activities.

By placing your trust with APC you have access to **unparalleled EU and international capabilities.**

Get ahead of the competition!

Trial programs are supported by strong **local knowledge** of new and existing markets through our network of consultants and team members strategically positioned across Europe.

APC can also uniquely offer **out-of-season testing** of products in locations such as South Africa, Australia and New Zealand, helping you solve technical issues and therefore secure a whole season's worth of extra sales - see reverse for further details...

Contact us today to find out how you can take advantage of all this and more

www.apc.eu.com

our team provides a complete service for the plant protection, biocide & chemical industries

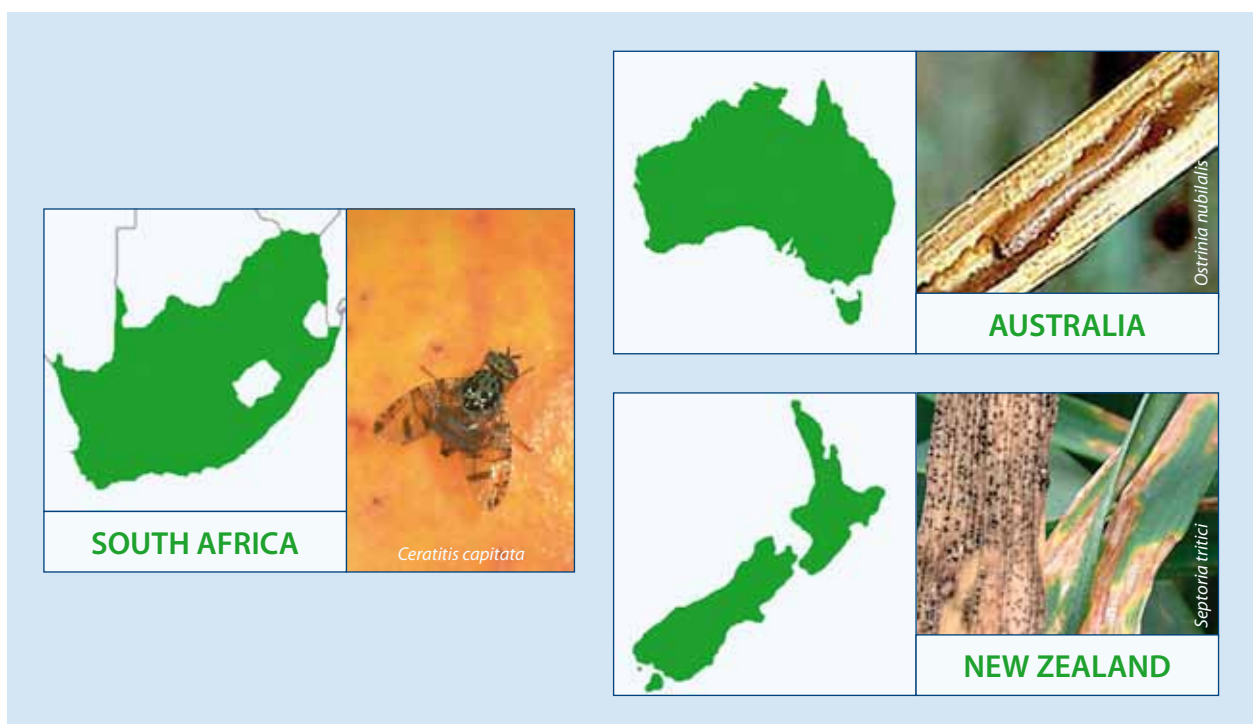

Field trials' out-of-season testing opportunities

Our clients have access to our unique out-of-season testing opportunities during the winter time in the northern hemisphere when field testing is not possible. For example:

- Screening of new compounds or novel formulations
- Dose selection and assessing the benefits of adjuvants
- Solving technical issues and improving product understanding
- Investigating new target pest, disease or weed spectrums

By undertaking trials in countries that provide comparable climates and crop/pest combinations to those found in Europe, our clients are able to undertake trial work up to a full season earlier than normal, ensuring that when your trial work begins in Europe you gain a head start over your competitors.

Crop opportunities include horticulture and agricultural crops
